

### HC-330 Ethylene diamine tetramethylene phosphonic acid (Sodium salt) (EDTMPs)

This product could be solved in water. It shows excellent scale inhibition property under the temperature of 200°C, especially for carbonate scales. It also has good thermal stability, excellent dispersion and scale inhibition property.

#### Applications:

It could be used as corrosion inhibitors in cooling water circulation system and boiler water. Also, it is a chelation agent in cyanogen-free plating industry and water softener in printing and dyeing industry.

#### Properties:

CAS Number	1429-50-1
Appearance	Clear yellow to amber solution
Typical active content:	28-30%
Specific gravity at (20°C)	1.30-1.40
pH, 1% solution at 25°C	9.5-10.5
Iron, ppm	/
Chloride, %	≤6.0

#### Packing:

250kg per PE drum

---
